I've just got a newholland 376 baler for some straw and hay baling. I've never had a small baler before and am a bit unsure of a couple of things 1. The baler is currently using sisal twine, would I need to change anything to use plastic? 2. What pto speed should I run it at ? And lastly any advice on what to check/grease/sharpen before I start Any advice would be greatly appreciated.

Operators who custom bale, especially for horse farms, are big fans of New Holland square balers. New Holland bales are the only choice for hand-feeding because they quickly separate into flakes. Professionals put their trust in BC5000 model balers because they make consistently dense, well-shaped bales that
